

Hailing from the ever burgeoning Florida music scene - which has brought us such acts as Oceana, Burden Of A Day, Versa Emerge, Underoath, A Day To Remember, and Evergreen Terrace - this 5 piece Orlando act has made their intentions clear to lay a claim for the throne, as they prepare to take the scene by storm with the release of their debut album "Kingdoms."

Rising above all contenders with their unique and dynamic melodies– Broadway deliver catchy sing-along hooks, interspersed with well placed breakdowns, and occasional bursts of screamed aggression (all the while, never losing their overall pop sensibilities).

Featuring guest vocals from Craig Owens of Chiodos (whose passionate vocal stylings mix brilliantly with Broadway's energy driven, melody laden song structures) along with the power and soulful appeal of Emarosa's Jonny Craig.

Recently picked up by management company "The Artery Foundation"(whose roster includes The Devil Wears Prada, A Day To Remember, Attack Attack!, A Skylit Drive and Breathe Carolina) and added to the Artery Foundation Across The Nation Tour 09 (June through Aug 1st) the band will be on the road continually from June through the new year, with a lot of big tour packages currently in the works.
